

*"We proudly fly this flag because we are blessed to live and work in the United States of America."*

—Ben Salzman  
President and CEO

## Flag Facts:

- 70- by 140-foot flag is the world's largest free-flying American flag
- Each stripe is over 5 feet high and each star nearly 3 feet across
- 9,800-square-foot flag weighs 340 pounds
- At 400 feet, the flagpole is the tallest in the world flying a U.S. flag
- Flagpole weighs approximately 420,000 pounds
- Flagpole is designed to withstand a low temperature of -42°F and wind speeds of 120mph
- Three pendulum-style tuned mass dampers reduce movement and vibration
- 11-foot diameter at base tapers to 5 1/2-foot diameter at top
- 680 cubic yards of concrete used in foundation
- Over 500 gallons of paint cover the pole
