

# Acuity's Telematics Program

Acuity is a proud supporter of the trucking industry. We insure over 45,000 trucks on the road today. From large fleets to owner-operators, we have the specific coverages you need to protect your business.

To further our goal of supporting the trucking industry and our customers, Acuity has partnered with two leaders in the telematics and dashcam space – Motive and Samsara. Both vendors offer driver monitoring and risk management tools to enhance safety and operational efficiency.

Acuity selected these vendor partners due to their product and service offerings, strong reputations, and customer reviews. Both provide a robust artificial intelligence (AI) component to their dashcam technology. The AI allows risky driver behavior to be proactively identified and addressed without a crash or event taking place.

Acuity customers can receive an **exclusive discount of up to 15%** from Motive or Samsara\*.

Customers who partner with one of these vendors and share their data with Acuity may also be eligible for a **premium discount**.

More information about each vendor can be found on the next page. Visit Acuity's telematics page at [acuity.com/telematics](https://acuity.com/telematics) to learn more about the program and see answers to FAQs.

\*Samsara's discount is only available to businesses operating fleets of 11 or more vehicles. Customers must also sign a 3- to 5-year contract with Samsara.

# Motive

**Improve Safety:** In-cab alerts paired with driver coaching help reduce safety incidents.

**Increase Sustainability:** Save on fuel and reduce your environmental impact with AI-powered insights and fleet fuel management.

**Streamline Maintenance:** Get notified when fleet maintenance is upcoming or overdue. Customize reminders based on time, distance, or usage hours.

samsara

**Improve Safety:** By combining AI-powered harsh event detection, real-time coaching tools, and easy-to-share video, Samsara dashcams can reduce accident frequency by up to 50% and lower collision-related claims by up to 60%.

**Generate Actionable Insights & Reports:** Increase operational efficiency with complete visibility into fleet performance and driver behavior.

**Enhance Driver Coaching:** Encourage safe driving and mitigate risk with Samsara's complete video-based driver safety program.
